Assembly and use

Along with all products a "Direction for assembly and use" is delivered. In this you will find a detailed description of the way of assembly.

After the frame has been mounted the chosen tabletop is mounted and the operation unit will be possible to fix at the bottom side of the table top. This operation unit has a push switch and a rocker switch.

With push switch A and rocker switch B it is possible to move the tabletop up and down and can be stopped at all levels. For safety reasons it is necessary to push both buttons at the same time for moving the table up and down.

Safety and tests

All ConSet sit and stand desk frames meet the necessary requirements within the following relevant categories:

- EN 527-1: Office furniture – Workplaces and desks – Part 1:
